

# Tallil Times

## IN BRIEF

### Thanks augmentees

The 407th Expeditionary Security Forces commander, along with the men and women of the 407th ESFS, would like to thank all of the personnel who performed augmentee duties over the past week. They would also like to thank each organization for the sacrifices made while these individuals were away from their work sections. The outstanding attitudes and sense of mission displayed by the augmentee force was truly gratifying. It is a pleasure to serve along side these proven professionals.

To the augmentees; thank you for your active role in defending the 10,000+ US and Coalition forces living and working on Ali.

### Check your W-2 for taxes

Before filing your 2004 tax return, make sure all taxable entitlements have been posted to your pay record for 2004.

If you were in a Combat Zone during December or prior months, then your income is tax exempt for that month. If you entered the CZ at the end of December then your pay record or Leave & Earnings Statement will not be updated for December. The Finance Office is trying to update entitlements by the cutoff in January. Any refund of December taxes withheld would need to be filed on your 2004 tax Federal return.

W-2s are available for view on myPay. Visit the myPay website at: <https://mypay.dfas.mil/>.

### Air Force PT Uniform

Per the 407th AEG commander, everyone who wears the new Air Force PT gear outside tent city, including visits to the DFAC, are not required to wear a reflective belt.

Master Sergeants John Jackson (Left) and Tyrone McKay (Right), 407th Expeditionary Security Forces Squadron, launch a Desert Hawk here Wednesday.

## Air Force Desert Hawk UAV

By Master Sgt. Terry J. Nelson

407th AEG Public Affairs

Not every unmanned aerial vehicle in the sky here is a Predator.

The 407th Expeditionary Security Forces Squadron is using its "Desert Hawk" a miniature UAV here, providing an extra set of eyes in the sky looking for essential real time information and threats.

The Desert Hawk was developed by Lockheed Martins Skunk Works group. Its currently part of the U.S. Air Force's Force Protection Airborne Surveillance System (FPASS).

The small, 7-pound remote control led aircraft is used by security forces airmen. The battery-powered aircraft has a wingspan of about 4 feet and flies for about an hour using its on-board rechargeable batteries.

"It is great working with the Desert Hawk. It is very simple actually, all we do is program grid coordinates into a laptop and launch," said Staff Sgt. James Ellis, 407th Expeditionary Security Forces. "As long as we don't have to alter the mission the plane

we have programmed will come back and land where we told it to."

For all the fancy adjectives and acronyms, the Desert Hawk is a remarkably simple, yet durable aircraft.

"We have been flying the Desert Hawk here at Tallil for about a year and a half, providing real time surveillance. We have done everything from keeping an eye on the Bedouins to sweeping the convoy routes before a convoy, said Sergeant Ellis.

The manual describes the plane as a state-of-the-art composite material, constructed of mold-injected expanded polypropylene.

It is basically Styrofoam," said Sergeant Ellis, "It's pretty tough, but we can glue and tape it back together if it breaks."

The little plane already has scars from missions here. Brown scuffs along the underside mark the plane's many landings on the desert plains, and small gray lines show the places where glue and tape connect the pieces replaced following missions.

## Coming to an Ali Base near you!

New showers and "Cadillac Latrines" are on the way! Col. Dennis Diggett said after signing the Form 9 request for purchase here Monday. "I can't think of too many things that are more important to the health and welfare of the force -- we should see these babies while we're here."

Photo by Master Sgt. Terry Nelson

These "Porta Johns" could be a thing of the past here at Ali Base. Colonel Diggett signed a new request for more "Cadillac Latrines" Monday.

## Tallil Talks ... Who is going to win the Super Bowl?

Master Sgt.  
Steve Almeida,  
407th AEG Command  
Post:

"The Patriots by 13.  
Because they always find a  
way to win and I am from  
Massachusetts."

Colonel Dennis Diggett,  
407th AEG commander:

"I think New England will  
win. They have a great team  
and it's a New England year  
with the whole Northeast  
area (except, of course, New  
York) still bouyed  
psychologically as a result of  
the Red Sox World Series  
win."

Senior Master Sgt.  
Whitney Jackson, 407th  
AEG PERSCO:

"The Patriots will win  
because they have the  
prettiest uniforms."

Master Sgt.  
Robert Sobush,  
407th ELRS:

"I think the Eagles will win. I  
always go for the NFC. The  
Packers should have been  
there."

Deadline for publication is 2 p.m. Thursday before the week of publication. For more information, call 445-2002, or e-mail the staff.

## Desert Hawk

Continued from Page 1

"We are only limited by the weather and battery life," Sergeant Ellis said. "The environment here makes it tough to fly, especially the wind. Getting the plane airborne, keeping it on track and having it land in a safe place when it's done is probably the hardest part of the (Desert Hawk) mission here."

The surveillance system is launched by a bungee cord and controlled with a portable computer system by operators on the ground. One of the strengths of the system is in its flexibility. The Desert Hawk aircraft can change route while airborne by changing the waypoints in the computer's software program. The plane can also lift interchangeable payloads of color cameras and thermal imagers for day and night operations, enhancing the vision of security forces on the ground.

"I have been operating the plane for almost five months here," said Sergeant Ellis. "In the five months, we flew security for personnel picking up some weapons caches, sweep convoy routes and provided overhead security for OSI and EOD weapon buy backs."

"These weapons are a big concern for us because not only could they be used against us but they present a hazard to the patrols out there driving around — there's a lot of unexploded ordnance in this area just waiting to go off," he added.

The base's security forces use the system as part of a comprehensive antiterrorism program. Together with remote sensors and standard foot patrols, the Predator's little brother helps keep the base and its people safe.

"Most of our UAV flights are supporting the squadron's random antiterrorism program," Sergeant Ellis said. "We'll vary our flight times and days of the week looking for signs of possible terrorist activity. We can be ready to fly almost anytime and see any part of the base and its surroundings quickly."

As the security forces airmen scan the sky of southern Iraq, from seven separate locations, the Desert Hawk is also returning images of the people returning to a normal way of life.

For the security forces airmen operating the system, their rotation here has been both

Photos by Master Sgt. Terry Nelson

Staff Sgt. James Ellis adjusts the camera in a Desert Hawk here Jan. 26. The Desert Hawk is a miniature UAV and is used by security forces to see beyond base perimeters and can provide a rapid assessment of detected threats.

a challenge and an opportunity. Protecting the base while operating a piece of cutting-edge technology has been an experience the airmen said they will not soon forget.

"I feel like we're making a difference for

our security forces on patrol at Tallil," Sergeant Ellis said. "Working with the Desert Hawk and supporting the mission here is something I'll remember for the rest of my career."

A Desert Hawk returns after patrolling the skies around Tallil Air Base Wednesday.

# January award winners recognized

Photos by Staff Sgt. Darcie Ibdapo

Colonel Dennis M. Diggett, 407th Air Expeditionary Group commander, congratulates monthly awards winners here January 25. The 407th AEG monthly awards program runs a little differently than most home station awards programs. Monthly winners were recognized for accomplishments between December 15, and January 15.

## Award winners were:

In the Airman Category; Senior Airman Brian Schleder, 407th Expeditionary Security Forces Squadron (Top Left).

In the Noncommissioned Officer Category; Staff Sergeant Edward Haddock, 777th Airlift Squadron (Above).

In the Senior Noncommissioned Officer Category; Master Sergeant James Hale, 407th Expeditionary Communications Squadron (Left).

The Company Grade Officer Category winner was Captain John Goodson, 407th Operational Support Squadron, picture unavailable.

Members of the 407th Expeditionary Security Forces Squadron's military working dogs section accept the Sharp Sabre Team Award Wednesday at the 407th AEG Headquarters Bldg. Team Members are Technical Sergeants Robert Tremmel, Bradley Guerry and Allen Lindsay; Staff Sergeants Phillip Shelite, Justin Devaney, Thomas Lowande II and Joshua Giles, and Senior Airmen Kenneth Rains and Aaron Lee.

Team Mission: To detect, deter and defeat all enemy forces by aggressively employing military working dogs tasks with the defense of 22 kilometers of interior/exterior fenceline on Ali AB and to provide explosive detection capability for 16,000 United States and Coalition Forces working in direct combat support of Operation IRAQI FREEDOM..

### 332nd Air Expeditionary Wing

**TUSKEGEE AIRMEN**  
THE LEGEND CONTINUES

# Aerial Port Flight keeps personnel, equipment moving

By Senior Airman Colleen Wronek

332nd AEW Public Affairs

BALAD AIR BASE, Iraq — The Aerial Port Flight knows the meaning of teamwork.

With more than 80 Airmen from around the world, this diverse team works with the Army and civilian contractors to ensure tons of personnel and cargo can arrive and depart the base.

“We’re responsible for the nuts and bolts of passenger and cargo movement on Balad,” said Senior Master Sgt. James Montgomery, 332nd Expeditionary Logistics Readiness Squadron Aerial Port Flight superintendent. “We are the ‘Tail Chasers.’ With short ground times, we off-load and on-load passengers and their cargo with precision.”

Since Jan. 1 the flight has worked around the clock handling more than 660 missions, which transported more than 11,000 passengers and 10,000 tons of cargo.

“We are responsible for getting the war-fighter, his assets, and critical supplies to the fight,” Sergeant Montgomery said. “Our goal is to put convoys out of business. The more cargo on the aircraft, the less we need to use convoys and risk losing more lives.”

Another important aspect of the Aerial Port Flight’s mission is the Air Terminal Operations Center.

The ATOC handles people entering and departing from the (area of responsibility) by manifesting the passenger listing, said Staff Sgt. Ron Jones, 332nd ELRS passenger Services NCO in charge. “Nobody comes in or out of the AOR without us.”

The ATOC prioritizes the movement of passengers by priority, date and time of signup, Sergeant Jones said. “If a person doesn’t make a certain flight, they are put into a back log,” he added.

U.S. Air Force photo by Staff Sgt. Neal Joiner

Aerial Port Flight members push a cargo pallet onto a cargo loader. Since Jan. 1 the flight has handled more than 10,000 tons of cargo.

Those working in the ATOC pass baggage weights and passenger numbers to the ramp controller who then forwards the information to the people loading the aircraft.

“It takes time to input the data and then time to load the cargo,” said Senior Airman Brandon Saldares, 332nd ELRS passenger services processor. “While working with the Army passenger terminal and getting the right information, we can unload and load passengers and cargo smoothly.”

“We make it happen every day,” Sergeant Montgomery said. “It’s one team and one fight. If we can save one of our brothers in arms life by eliminating the need for convoys, then we have done our job.”

Sergeant Montgomery, Sergeant Jones and Airman Saldares are all from Travis AFB, Calif.

## AROUND YOUR AIR FORCE

### Fire destroys Patrick club

**PATRICK AIR FORCE BASE, Fla. (AFPN)**— More than 70 firefighters and public safety officials from here and several surrounding civilian communities responded to a fire that destroyed most of the officers club Jan. 31.

Everyone was evacuated safely at about 7 p.m. when workers noticed smoke in the building. First responders from the base were quickly joined by others, base officials said.

Base officials are starting to calculate the damage to the building and its contents.

Damage assessments, clean-up operations and an investigation into the cause of the fire are ongoing.

“Our officers club sustained extensive damage. It’s a huge loss to the Patrick community,” said Lt. Col. Rick Czerwinski, 45th Mission Support Group deputy commander. “There is no timeline on the investigation. We’re looking into transferring as many of the programs and services offered at the officers club to other facilities on base.”

The 35,000 square foot club has been at its current location since 1951. It has about 3,800 members and is the hub of many social functions and special events on the base such as weddings and various civic-club meetings.

# Congratulations February Promotees

By Master Sgt. Terry Nelson

407th AEG Public Affairs

Airman from the 407th Air Expeditionary Group were presented with new stripes Monday during the February enlisted promotion ceremony held at the Big Top here in tent city.

Fifteen enlisted members with promotion date effective February 1, and four Airman who were promoted January 1, but not formally recognized, had their new rank tacked on by friends and co-workers as a crowd of 250 people were on hand to show their support.

## Promoted to Airman First Class were:

Jason Gabrick\*, Steve Herriott and Jacob McCarty

## Promoted to Senior Airman were:

Carlton Edwards\*, Steven Eggert, Michael Hamaker, Edgar Lira-Anguiano, Michael Pendleton\*, Michael Pratt\* and Esteban Salazar-Carrasco

## Promoted to Staff Sergeant were:

Scott Farnham, Ivy Nisperos and Christopher Watson

## Promoted to Technical Sergeant were:

Norman Becker, Bradley Guerry, Allen Lindsay, Marisol Mesta and James Vanover

## Promoted to Master Sergeant was:

Christopher Maike

\* Were promoted in January but not formally recognized.

Photos by Staff Sgt. Darcie Ildapao

Promotees pose for a photograph with Colonel Dennis M. Diggett, 407th AEG commander, and Chief Master Sgt. James Lawrence 407th AEG superintendent at the Big Top here Monday.

## Now That's Tacking on A Stripe

Technical Sergeant Norman Becker (Right) has his new stripes tacked on in an unorthodox fashion by friends at Monday's monthly promotion ceremony here at the Big Top in Tent City.

Staff Sergeants Scott Farnham, Ivy Nisperos and Christopher Watson, take the Noncommissioned Officers Oath as new Staff Sergeants Monday after being promoted.

Master Sergeant Christopher Maike takes the Senior Noncommissioned Officers Oath Monday after being promoted.

# Fire prevention – Everyone's responsibility

By Tech Sgt. Walter Wright

407th ECES Fire Prevention

Now that we have all begun to settle in to our new living conditions here at Tallil AB/Alī Base, most of us have started into a daily routine.

It is important to incorporate a routine for safety and fire prevention, as well as a touch of common courtesy. Recent inspections on high interest areas around tent city, has identified two areas that need immediate attention, smoking areas and laundry tents.

Designated smoking areas in tent city are located throughout the camp. Each smoking area has a metal receptacle (Butt Cans), labeled "Butts only".

No you don't sit on them, but, no pun intended, these receptacles are not for trash either. Each area has a portable fire extinguisher in place and will most likely be used if trash is continually placed in the Butt can.

We are in the process of placing metal garbage cans in and around the smoking areas for trash only. We're confident that you will help us all on this matter.

Now on to the laundry tents. Laundry tents have excessive dryer lint build-up behind the dryer units. It takes less than ten seconds to throw that tiny weightless piece of lint in the trash.

If you think it's difficult to get your laundry done now, it would be almost impossible, if we lost an entire laundry tent due to fire. Lint build-up is the number one cause of dryer fires.

If you see a mess in these tents, do everyone a favor and clean it up, you are helping us all out by being a conscious neighbor. Please keep this important safety rules in mind while utilizing the smoking areas. Below is referenced from the 407 AEGI 32-2001 Fire Prevention Program

## Smoking/Designated Tobacco Use Areas

- Smoking is only permitted in designated tobacco use areas approved by the Fire Chief.
- Do not smoke in tents, under tent vestibules, Air Force Facilities, while driving or while walking
- Personnel will not smoke on the flightline or within 50 feet of any aircraft
- Designated Tobacco use/smoking area minimum fire safety requirements;
- All areas where smoking is permitted will contain metal receptacles (Butt Can) labeled "Butts only."
- A sign showing the area is designated tobacco use area will be posted (Pick one up at the Air Force Fire Prevention Office).
- A portable fire extinguisher will be available at all approved smoking areas.
- Designated smoking areas will be a minimum 25 feet away from any tents, facility entrance, or trailer.
- Do not relocate smoking areas without approval of the Fire Chief.
- Do not place smoking materials in trashcans
- Keep butt cans free of combustible materials (i.e. trash, paper, plastic items, etc.)

Courtesy Photo

Butt cans are to be used for cigarettes, not trash. This is a prime example of a fire hazard. A smoldering cigarette butt could set the garbage in this butt can on fire.

- Do not carelessly dispose of smoking materials by throwing smoking items on the ground.
- Smokers will clean out butt cans when they are half full in the following method. Fill the bottom of a garbage bag with water. Dump smoking materials into the garbage bag. Thoroughly soak smoking materials and then discard with regular trash. Emptying smoking material cans is a user responsibility.

## Safety First

It's the 407th AEG Ground Safety office's job to ensure the safety of over 1,300 Air Force personnel along with our coalition partners.

Everyone must remember that just because we are in Iraq, we cannot toss safety out the window. With very few exceptions, the same rules that apply at your home stations need to be followed here.

If you have to ask yourself is this safe, the odds are good that it's not. Don't endanger your life or the lives of others by taking unnecessary risks, even in a deployed environment.

Since the safety staff cannot be everywhere at all times, they need the help of everyone from the lowest ranking Airman to the group CC to look out for each other.

Nothing is more harmful to the morale of our people than having a friend or co-worker injured or even losing their life. For the next four months we are all extended family members. Look out for your coworker's safety as you would your own family's safety back home.

(Article written by Staff Sgt. Tawanna Sellars, 407 AEG Ground Safety)

## 407th AEG Warrior of the Week A1C Cassie Rowan

**Unit:** 407th Expeditionary Security Forces Squadron

**Home unit:** 4th Security Forces Sq., Seymour-Johnson AFB, NC.

### Why other warriors say she's a warrior:

Airmen Rowan has assisted processing over 1200 Local National and Third Country Nationals personnel onto Tallil AB while performing duties as the Visitor Control Center controller. Airman Rowan further assisted with the searching and processing over 460 vehicles needing access to the base through the vehicle search area. A1C Rowan's attention to detail and professionalism ensured prevention of contraband, weapons and explosives from entering the United States and Coalition controlled compound!

### What is your most memorable Air Force experience:

This deployment, since it is my first. I have only been in the Air Force for 14 months.

## Identify This

**KNOW WHAT THIS IS?** Each week, the "Tallil Times" staff takes a photo from around Tallil AB. If you can identify the object or item, shoot us an e-mail at: [tallil.times@tlab.aorcentaf.af.mil](mailto:tallil.times@tlab.aorcentaf.af.mil). with "Identify This" in the subject block. The winner receives a prize and gets their name printed in the Tallil Times. Congratulations to Senior Airman Matthew Moore for correctly identifying the photo in last week's newspaper of the battery.

## Wild Iraqi Safari

### Wolf Spider

The large brown spider frequently seen on Tallil is a type of wolf spider, so named because they stalk their prey.

Wolf spiders have a worldwide distribution. Typically these spiders are rather drab — most are brown or grey in color. Usually wolf spiders are seen at night, on the ground, moving quickly. Unlike web-building spiders, the wolf spiders don't construct a web to trap their prey. Rather, the wolf spiders use their speed, strength and good vision to run down and capture prey. Then with rather large fangs, they kill their prey with a venomous bite. Like any self-respecting spider, the wolf spider injects digestive enzymes into its captured prey to create a nutritive slurry that it then sucks up. Their diet consists of insects and any other small animals they can capture. Though they don't weave a web, the wolf spiders do leave behind a drag line of silk. Female spiders leave scent markings on their drag lines, and the male spiders use the scent markings to locate a female. After mating, a female uses her silk to construct a spherical egg sac. She attaches the egg sac to her body with silk, and carries the egg sac with her until the eggs hatch. After hatching, the spiderlings crawl onto to the mother's back to mature a bit more before dispersing.

**Did you know?** Like the spiderlings in Charlotte's Web, wolf spiderlings disperse aurally by ballooning. To balloon, the spiderlings let out a thin line of silk into the air. Eventually, the ever lengthening line is picked up by the wind and the line and attached spider are carried away. Spiders can be transported great distances by ballooning.

*Column courtesy of John Ploch, Vector Control, KBR contractor and Lt. Col. John Putnam, 407th Leishmaniasis Surveillance and Investigation Team..*

## OUT AND ABOUT

### Worship services

Worship is at the 407th Air Expeditionary Group Oasis of Peace Chapel, unless otherwise noted. The chapel is open 24 hours a day for prayer and reflection. For details on worship opportunities, call 445-2006.

#### Sunday

**8 a.m.** Roman Catholic Mass  
**9:30 a.m.** Traditional Protestant service  
**10 a.m.** LDS service at the Army's Religious Activity Center

# What you need to know about finance

By Staff Sgt. Jaysa Davis

407th AEG Financial Management

For many, this may be a first deployment. Knowing what to expect with your military pay will help you have a financial plan while you are away for your home duty station. There are two entitlements that you will get while you are deployed and two entitlements you will receive upon returning to your home duty station.

While deployed you will be receiving Hostile Fire Pay/Imminent Danger Pay, at \$225.00 per month and Combat Zone Tax Exclusion (CZTE) which will affect your federal and state taxes. Both these entitlements are based on a monthly rate. This means, if you are here for part of the month you will be paid for the entire month. The entitlements are processed by AI Udiel upon your arrival to the AOR. Because your entitlements are

processed by another base, it may take up to two pay periods for them to show up in your pay check and on your LES.

Once you return to your home duty station and file your final travel voucher, there are up to three entitlements that you can receive, depending on your marital and housing status. The first entitlement that everybody will receive is Hardship Duty Pay or Save Pay, at \$100.00 per month. This entitlement is prorated on a daily basis. This means that if you were here for part of the month you will only get paid for the time that you were actually here.

Another entitlement you can receive is Family Separation Allowance (FSA), at \$250.00 per month which is also prorated on a daily basis. This entitlement is for members who resided with their dependents or military spouse prior to separation and must be separated for more than

30 consecutive days. Once you file your final travel voucher, this entitlement will be included with your military pay.

The last entitlement members can receive is Basic Allowance for Substance (BAS). This entitlement will apply only to dorm residents receiving meal deductions, as everybody else will already be receiving this entitlement. If you are on meal card and normally have meal deductions taken from your military pay, your BAS will be credited back to your military pay for the

time that you were deployed once you return to your home duty station.

It is important to remember to file your travel voucher within five duty days upon returning to your home duty station to ensure that your entitlements are paid correctly. Filing your travel voucher will stop the entitlements that you are currently getting and pay out the entitlements that you are due. Educating yourself with these entitlements will make it easier to manage your finances while deployed.

## Muscle Beach Events

**Today,** Yoga at 5:30 a.m.

Karate, Kenpo/Aikido  
at 9:00 p.m.

**Saturday,** Hoop Challenge  
at 7 p.m.

**Sunday,** Open

**Monday,** Taebo at 5:30 a.m.  
Karate, Kenpo/  
Aikido at 9 p.m.

**Tuesday,** Tai Chi at 5:30 a.m.  
Dead Lift Competition  
at 6 p.m.

**Wednesday,** Taebo at 5:30  
a.m. Karate, Kenpo/  
Aikido at 9 p.m.

**Thursday,** Tai Chi, 5:30 a.m.  
Dodge Ball Competition  
at 7 p.m., Big Top

**Feb. 11,** Yoga at 5:30 a.m.,
